

Public Lighting Maintenance

Customer: **AusNet Services**

Country: **Australia**

Site: **Victoria**

PROJECT DESCRIPTION

Under this contract Omexom Australia provides the following services for the 108,000 public lights managed by AusNet Services:

- Maintenance and repair of street lighting reported as faulty or defective by the public and customers
- Routine patrols to identify and repair defective lights
- Bulk change programs for cyclical replacement of globes
- Replacement of existing lights with energy efficient fittings
- Supply and logistics management for all light fittings and materials required for the works

The contract was initially awarded for a 3 year term and has now extended over a 9 year period.
