

## Asset Inspection Services

Customer: **Powercor Australia and CitiPower**

Country: **Australia**

Site: **Melbourne metro/Western Victoria**

### PROJECT DESCRIPTION

Omexom achieved a major milestone in 2017 with the completion of 20 years continuously undertaking Asset Inspection services across the Powercor and CitiPower networks. Our reliable performance and the strong and trusting relationship between the parties have since been instrumental in a further award to mid 2022.

The contract has expanded and now involves inspection of approximately 250,000 pa under a combination of 5 year and 2.5 year cycles. The work includes the Inspection, condition assessment and reporting of distribution poles below/above ground line, pole top structures, cross arms including top face inspection, mains conductors and overhead services and street lights.
