

Western Power Asset Inspection

Customer: Western Power

Country: Australia

Site: Perth

PROJECT DESCRIPTION

The contract requires Omexom-Electrix to carry out inspection and minor maintenance tasks on approximately 100,000 poles per year. The scope of work includes:

- Ground line/below ground condition assessment of wood poles;
- Inspection of the top face of cross-arms, conductors and pole top attachments
- Visual inspection/thermo-graphic imaging of pole mounted switches;
- Treatment for internal rot and termites and corrosion;
- Minor maintenance - replacing earth and stay guards;
- Recording GPS Coordinates, digital photographs of defects;
- Capture of required asset data utilising handheld PDA's.
